### TASTING NOTES

A wine colour on a pale yellow with silver nuances on the edges. Complex and intense aromatic nose of citrus, white flowers layered with notes of wet stones and elegant oak tones. The palate is rich but remain tight and restrained with expressive aromatic of riped citrus and light nuances of exotic fruits. The texture is well balanced by a strong base of mineral acidity and fruit weight.. The finale is quite long and restrained on minerality and stoned fruits.

### SOILS & CLIMATES

Selected plots from our plateau area sitting over our bedrock of limestone nuanced by various depth of silt and clay. Fairly cool climate due to our oceanic influence, our surrounding valley and our proximity to natural underground water. Our expositions are mainly north east and south east according to the variety's most suitable climate.

### VINEYARD

Sustainable practices without any usage of herbicides and insecticides moving toward organic certification. Average yield around 35 hl/ha. Soils and canopy management based on the balance's preservation of each block. Hand harvest only.

### WINEMAKING

All blocks are vinified separately after the fruit being carefully sorted and preserved after harvest. Meticulous selection of our press qualities before to start our process of settling and fermentation. Temperature controlled fermentation with minimal intervention in order to showcase and preserve the identity of our fruit and the natural balance of each climate. 30 to 40 % of the fruit is new barrel fermented and aged, and the remaining in stainless steel. Our goal is to keep the wine balanced toward freshness, tension and minerality with oak being here just like an element of complexity. After a light ageing of 7 months on fine lees, the wine is created with our best lots and then bottled up for an additional ageing in bottles of 1 year.
